QUANTITATIVE GEOPHYSICIST

Job reference number: EL-2015

Application Deadline and Start Date: This position will remain open until a suitable candidate has been found.

Expertise: methods of earthquake location

Benefits: starting salary of £29-31K per annum gross, 6 weeks paid annual leave, attending an international conference annually.

Location: Thatcham, Berkshire, U.K.

Term: 3 years with a strong possibility of continuation.

Employer description: International Seismological Centre (ISC) is a non-profit organization, collecting and analysing earthquake bulletin data for distribution worldwide.

Job description: Advancing the global earthquake location algorithms and improving the datasets at the ISC.

Job requirements: We are looking for an MSc or PhD graduate in Geophysics or an equivalent field with strong skills in numerical analysis to work under general guidance from experienced seismologists. The successful candidate will have skills in using modern programming languages, including C. Familiarity with global tectonics would be an advantage.

To apply: please send your CV and a covering letter focussed on the job requirements and the names and e-mail addresses of two referees to admin@isc.ac.uk quoting the specific job reference number EL-2015. Applications failing to address the above requests will not be considered.
