SEISMOLOGIST

Job reference number: DC-2015

Application deadline: April 26, 2015

Expertise: data collection

Start Date: August 2015

Benefits: £27-31K per annum gross, 6 weeks paid annual leave, attending an international conference annually.

Location: Thatcham, Berkshire, U.K.

Term: 3 years with a strong possibility of continuation.

Employer description: International Seismological Centre (ISC) is a non-profit organization, collecting and analysing earthquake bulletin data for distribution worldwide.

Job description: Enhancing the work of the ISC analysis and data entry teams by communicating with networks, identifying, sourcing, integrating and validating new seismological bulletin datasets from permanent and temporary deployments worldwide as well as scanning scientific literature for possible new sources of data to enhance the ISC Bulletin.

Job requirements: We are looking for a university graduate with experience in observational seismology, excellent communication skills and experience in developing basic computer codes for parsing data into the relational database. Good command of English is required. Working knowledge of other widely spoken languages would be an advantage.

To apply: please send your CV and a covering letter focused on your experience relevant to the job requirements and the names and e-mail addresses of two referees to admin@isc.ac.uk quoting the specific job reference number DC-2015. Applications failing to address the above requests will not be considered.
