

International Training Course on Seismology (GFZ Potsdam, Germany)

The **GFZ German Research Center for Geosciences**, organizes annually **International Training Courses on 'Seismology and Seismic Hazard Assessment'**

<https://www.gfz-potsdam.de/en/about-us/education-and-training/seismology-and-hazard-assessment>

The training courses provide theoretical fundamentals and practical training in applied seismology, for geoscientists and engineers from earthquake-prone developing countries. The program is particularly useful for seismological station and network operators, data interpreters and those concerned with seismic zoning and hazard assessment. These postgraduate courses are part of the educational and training programs of the GFZ Potsdam, the Federal Foreign Office of Germany, UNESCO, and UNDRR in the field of geosciences and disaster mitigation.

The 4-week training course 2023 will take place in Germany at the GFZ Potsdam, **from June 21 to July 19, 2023**. We invite young scientists and engineers from developing countries to apply to the course. The course circular, scientific programme and application form for the course 2023 can be downloaded from our web page. Deadline for application is **April 14, 2023**.
